

SL Rules

Modus Ponens ($\rightarrow E$)

| P \rightarrow Q
| P
├ Q

Conjunction Introduction ($\wedge I$)

| P
| Q
├ (P \wedge Q)

Conjunction Elimination ($\wedge E$)

| (P \wedge Q)
├ P
├ Q

Disjunction Introduction ($\vee I$)

| (P)
├ P \vee Q

Disjunction Elimination ($\vee E$)

| P \vee Q
| \neg P
├ Q

Biconditional Elimination ($\leftrightarrow E$)

| (P \leftrightarrow Q)
├ P \rightarrow Q

Negation Elimination ($\neg E$)

| $\neg \neg$ P
├ P

Hypothetical Rules

Conditional Introduction ($\rightarrow I$)

|

| $n.$ P
├
:
 $m.$ Q
P \rightarrow Q

Reductio ad Absurdum(RAA)

|

| $n.$ P
├
:
 $m.$ Q
 $m' \neg$ Q
 \neg P

Argument by Cases (AC)(First Form)

|

P \vee Q
P \rightarrow R
Q \rightarrow R
R

For 2nd form , first prove $P \rightarrow R$ and $Q \rightarrow R$
using ($\rightarrow I$)
